

I am outraged that chairman Powell has not made a concerted effort to inform the public about the proposed deregulation of the FCC. This is such an important issue that more public input is needed before a vote is taken. The citizens of this country have a right to know about changes in FCC policy that will effect their lives in such a substantial way. The FCC is designed to serve the public interest, not to benifit the corperate interest. We need to restore Democracy to this country. What is Chairman Powell thinking? I am angredered by his apparent clandistine plan for further deregulation.
